

Correction Notice: Polysome Fractionation to Analyze mRNA Distribution Profiles

Amaresh C. Panda*, Jennifer L. Martindale and Myriam Gorospe

Laboratory of Genetics and Genomics, National Institute on Aging, National Institutes of Health, Biomedical Research Center, Baltimore, USA

*For correspondence: amarchpanda@gmail.com

Regarding [28516123](https://doi.org/10.21769/BioProtoc.2126) (<https://bio-protocol.org/e2126>), we recently realized that the recipe for the “10x salts buffer” in the Recipes section, point 2, was incorrectly given as “1x salts buffer”. As highlighted in the attachment, the correct concentrations for “10x salts buffer” are:

1,000 mM NaCl

200 mM Tris-HCl (pH 7.5)

50 mM MgCl₂

We apologize for not catching this sooner.
