After official publication of our protocol in Bio-protocol (<https://bio-protocol.org/e3749>) we noted an error in the protocol.

In the Materials and Reagents section, the catalog number of Bst DNA Polymerase is "BRP-200", which is completely wrong. Correct catalog number of Bst DNA Polymerase is "BPL-300". Accordingly, we have now corrected as follows:

5. Bst DNA Polymerase (McLab, catalog number: **BPL-300**). Store at -20 °C
